

Aerogrip

- Aerogrip has been developed as a method of fixing non-woven breather fabrics and woven peel plies, to vertical surfaces where standard flashtapes do not offer sufficient adhesion
- Aerogrip holds these materials in place due to a unique series of peaks that are moulded into the surface of the tape
- Aerogrip is available in 25mm or 50mm wide rolls, with an acrylic adhesive system
- Aerogrip is reusable when subject to vacuum only cures up to temperatures of 180°C, but the tape may only be used once when subjected to autoclave pressure

PHYSICAL PROPERTIES

- Maximum Cure Temperature 180°C
- Colour Black
- Construction Nylon
- Adhesive Acrylic

Note: As the adhesive may not strip cleanly when used at temperatures of +180°C, we recommend that Aerogrip is applied to the surface of a flashtape to avoid possible pollution of the tool surface

AVAILABILITY & PACKAGING

- Standard widths 25mm and 50mm
- Roll length 25m

STORAGE & HANDLING

- No special requirements
