

VAC-PLY VMS3

Microporous vacuum line for resin infusion processes

Features and Benefits

- A multilayer product designed to maximize air removal during infusion and cure of composite components.
- Suitable for resin infusion and prepreg processing.
- Designed for air removal of large structures where maintaining vacuum over long distances is critical
- Complex vacuum line networks can be constructed for optimized air removal and resin flow.
- Designed to optimize impregnation and avoid dry spots during infusion by managing convergent resin flow paths.
- Multi coloured vacuum line to aid correct orientation

SPECIFICATIONS

Maximum Use Temperature	80°C (176°F) during infusion. Withstands an exothermic peak of 140°C (285°F)
Colour	Orange on release side, white on outer side
Format	Available with micro-perforated release film as standard. Peel ply or Teflon coated available on request

AVAILABILITY

- 100 meters rolls in 100, 150 and 300 mm width.
- Minimum order quantity is one roll.

STORAGE

No specific requirement.

HEALTH & SAFETY

Please refer to the product MSDS for safe handling, personal protective equipment recommendations and disposal considerations.
